## Abstract guidelines and instructions: Replace this model abstract with your own abstract

Helm M<sup>1</sup>, Hauke J<sup>1</sup>

<sup>1</sup> Federal Armed Forces Medical Centre, Ulm, Germany

**Aims:** The purpose of this model is to help you compose a clear and concise abstract with easy readability.

**Methods:** The abstract text can be written using a computer with a word processing program. The font used is Times New Roman 11 points with the title in bold and subtitles in bold. After having checked that the abstract (including the title, authors and organisation) does not exceed the given space, the text can be copied and pasted in this box on this abstract form to replace the model text. The completed abstract form can then be sent by e-mail as an attachment to the congress secretariat, e-mail address: [freepapers@traumacare2009.com](mailto:freepapers@traumacare2009.com)

**Results:** By following these directions, a nice looking abstract can be obtained with interesting results to be presented at the congress.

**Conclusions:** Believe it or not, with careful word selection your most interesting results and conclusions can be presented within the given space. If you are unable to replace the text in this box with your own abstract, please use a blank Word document.
